

## Preparing Hold Harmless Cards with Automatic Form Numbering

To prepare a number of Hold Harmless forms with sequential numbers and avoid editing each form to change the forms number, use the Rifle Range Hold Harmless (Auto Form Numbering) document from the web site.

Automatic Hold Harmless form numbering can be accomplished by double-clicking on the document header, right-clicking on the highlighted form #, selecting "Format Page Numbers..." and setting page numbering to start at the desired form #.

This page can then be copied a number of times to format the desired number of Hold Harmless forms, each with a different form number. This method achieves the printing of a range of form numbers without the need to edit the form # on each page.
